

SAFE ACID

Technical Data Sheet

Product Description

Spirit Safe Acid is an alternative to mineral acid cleaners, formulated with new organic salt technology. Designed to remove concrete and mortar spills, heavy efflorescence, light and heavy grout haze, & rust stains. It is extremely effective for restoring colour in faded, aged concrete pavers.

Features & Benefits

- Powerful acidic cleaner which is safe for the user.
- Contains no strong mineral acids and has no VOC's.
- Restores colour in concrete pavers, leaving them looking brand new.
- Breaks down heavy efflorescence.
- Effectively cleans tools covered in glues, grouts and mortar.
- Safe alternative to dangerous acids such as hydrochloric/muriatic acid.

Where to use

- Ceramic Tiles, Porcelain Tiles & grout joints
- Concrete & Concrete Pavers
- Terracotta, Tessellated Tiles
- Non calcium based natural stone (always test before use on natural stone)

Where not to use

- Acid sensitive calcium based stones like travertine, marble or limestone

Method of application

1. Test first before use to ensure you will not damage the surface you are cleaning.
2. Mix **Spirit Safe Acid** with clean water to the desired strength (see back of bottle for a guide to dilution rates)
3. Sweep or vacuum the area to remove any loose debris
4. Dampen the surface with clean water and then apply the solution
5. Scrub the affected area with a **Spirit Doodlebug** or firm bristle brush (**Spirit Safe Acid** can noticeably etch smooth coloured pavers if left to dwell on the surface for too long)
6. Remove slurry and rinse with **Spirit Neutral Cleaner** to neutralise any residual acidity. This step is important in preparing the surface for sealing.

Available sizes

1ltr, 4ltr, 15ltr Drums
